Based on these estimated revenue collections, we accurately estimate a state's premium cigar collections based on cigar imports reports (U.S. Bureau of the Census, Imports of Merchandise for Consumption, IM-146, data of the U.S. Customs Service) and tax collections (Tax Burden on Tobacco).

Note: In 2009, federal tobacco tax excise tax (FET) increase on cigars went into effect--retailers paying additional state excise tax due to higher wholesale price that included higher FET.

About the Tax Burden on Tobacco: The first volume was produced in 1949 by the Virginia-based Tobacco Tax Council under the name *Cigarette Taxes in the United States*. In 1966, the Council gave the annual its current name. From 1982 through 1998, The Tobacco Institute published the book. The economic consulting firm Orzechowski and Walker is now producing *The Tax Burden on Tobacco*. This volume was prepared with the financial support of Altria Client Services, the Lorillard Tobacco Company, and Reynolds American.
