Rule Set No.: 2013-111-LR

Complete to: 06/30/15

BACKGROUND & SUMMARY OF PROPOSED RULES SUBMITTED TO JCAR

2013-111-LR would amend and rescind rules to adopt, by reference, the 2014 National Electrical Code, with specified exceptions and amendments, and specified 2013 National Fire Protection Association standards, while codifying current administrative practices and raising prices for copies of the code and standards. Additionally, the proposed rules would authorize registered building inspectors, under specified conditions, to inspect and approve concrete enclosed electrodes; currently only electrical inspectors are so authorized.

FISCAL IMPACT OF PROPOSED RULES

The rules amended and rescinded by 2013-111-LR would not have a significant fiscal impact on the state or local units of government; however, there could be a nominal fiscal impact to the extent that installation of concrete enclosed electrodes would only necessitate inspection by building inspectors, rather than both building and electrical inspectors.
