

MEMORANDUM

DATE: August 19, 2014
TO: Interested Parties
FROM: Kyle I. Jen, Deputy Director
RE: Changes in State Appropriations

This memo provides information on changes in state appropriation amounts over the last decade. The end point for all comparisons is the FY 2014-15 state budget as initially enacted through Public Acts 196 and 252 of 2014. Appropriation amounts are presented based on three different measures:

Adjusted Gross Appropriations: Total state appropriations from all fund sources, including state, local, private, and federal sources (but subtracting funds appropriated in multiple places in the state budget through interdepartmental grants or intradepartmental transfers). This measure captures the total anticipated financial impact of all funds appropriated by the Legislature. Federal grants are almost always dedicated to specific purposes, with varying levels of flexibility, and generally cannot be used to supplant state funds on an ongoing basis.

State-Source Appropriations: State appropriations from state sources only, including both the state General Fund and restricted funds. This measure captures the amount of authorized spending from resources generated through taxes, fees, and other sources created by the state constitution or statute.

General Fund/General Purpose (GF/GP) Appropriations: State appropriations from the unrestricted portion of the state General Fund. This measure captures the amount of authorized spending from resources available to the Legislature that are not in some way restricted by constitutional or statutory provisions.

When making comparisons between appropriation amounts across multiple years, a number of caveats apply:

Reorganizations and Program Transfers: Changes in appropriation amounts for specific budget areas are complicated by a number of departmental reorganizations and program transfers that have occurred over the last decade. A list of the largest such reorganizations/transfers over the last decade is included following this cover memo.

GF/GP Offsets: GF/GP appropriation amounts may fluctuate over time as funding amounts or sources are reclassified as restricted or unrestricted (for example, the transition from the Use Tax on Medicaid Managed Care Organizations, which is classified as GF/GP revenue, to the restricted Health Insurance Claims Assessment and then to a combination of the two in the Community Health budget). Additionally, federal funds received under the American Recovery and Reinvestment Act (ARRA) in fiscal years (FYS) 2008-09, 2009-10, and 2010-11 temporarily reduced the need for GF/GP and other state-level appropriations to fund ongoing programs.

One-Time Appropriations: In the last several years, some appropriation amounts have been designated as "one-time," indicating intent that those items would not be funded in the subsequent budget year in order to maintain a structurally-balanced budget. Those appropriations are included in appropriation totals in order to provide an accurate representation of resources available for expenditure each year by state departments, local units of government, and other entities receiving funds through the state budget.

School Aid Revenue: Beginning in FY 2011-12, School Aid Fund revenue has been appropriated in the Community Colleges and Higher Education budgets, offsetting funds previously appropriated from GF/GP revenue. Such an appropriation was made in the Community Colleges budget in FY 2009-10, as well.

Retirement-Related Funding: In FY 2011-12, the state began prefunding retiree health benefit costs (known as Other Post-Employment Benefits, or OPEB) for state employees, rather than funding them on a pay-as-you-go basis. Beginning in FY 2012-13, funding has been built into the School Aid and Community College budgets to fund a rate cap for retirement unfunded liability costs and certain other retirement-related costs. The associated appropriation increases for state departments (Corrections, in particular), School Aid, and Community Colleges reflect changes in how retirement costs are funded, rather than an increase in operational expenditures.

Inflation: The cost of providing the same level of a particular government service often rises over time. The appropriation amounts presented in this document have not been adjusted for inflation. The consumer price index (CPI) provides a broad measure of inflationary cost growth over the last decade, although it does not account for changes in target populations for state programs (Medicaid caseloads, prison populations, educational enrollments, etc.) or cost increases for state government that may exceed those experienced by consumers. Appropriation growth can also be compared to personal income growth, providing a measure of the proportion of total household economic resources in the state being allocated through the state budget.

Mid-Year Adjustments: Appropriation amounts change throughout the fiscal year, as the budget is adjusted through supplemental appropriations and other mechanisms. The appropriation amounts presented in this document for years prior to FY 2014-15 are current or final year-to-date amounts and do not, therefore, reflect the budget initially enacted by the Legislature each year.

Final Expenditures: Appropriation amounts reflect amounts authorized for expenditure by the state through legislative actions, not final expenditures. The exception to this statement is Revenue Sharing amounts, which have been adjusted to reflect final (or estimated) Constitutional payments that are tied to sales tax revenue collection levels.

Fund Transfers: Appropriation amounts do not include transfers between funds—for example, the transfers from the General Fund to the Budget Stabilization Fund in recent years. (The FY 2013-14 appropriation of \$194.8 million from the Settlement Administration Fund for the Detroit pension systems, the funding for which was transferred from the BSF, is, however, included in the Treasury Operations appropriation total for that year.)

Payments to Locals: Payments-to-locals amounts are estimates based on appropriation amounts (again, with the exception of Revenue Sharing). Under the State Constitution, a minimum of 48.97% of annual state spending from state-source appropriations must be paid to local units of government.

Attached to this memo are seven tables and charts showing historical information on state appropriations.

- Attachment 1: Adjusted Gross Appropriations by Budget Area
- Attachment 2: State-Source Appropriations by Budget Area
- Attachment 3: GF/GP Appropriations by Budget Area
- Attachment 4: Percentage Change in State Appropriations by Major Area
- Attachment 5: Adjusted Gross Appropriations by Fund Source (chart)
- Attachment 6: State-Source Appropriations by Major Budget Area (chart)
- Attachment 7: Estimated Payments to Locals as a Percentage of State-Source Appropriations (chart)

Additionally, a list of notes regarding departmental reorganizations and program transfers is included (prior to Attachment 1).

Major Departmental Reorganizations and Program Transfers
Fiscal Years 2004-05 to 2014-15

1. Library funding was shifted into the Department of Education budget (from the Department of History, Arts, & Libraries) in FY 2009-10, and Child Care Subsidy funding was shifted from the Department of Human Services budget to the Department of Education budget in FY 2011-12.
2. Since FY 2008-09, School Aid appropriations include approximately \$342.0 million in funding that was previously local revenue but was shifted to state revenue due to changes in the Personal Property and Michigan Business Taxes.
3. The Department of Civil Service was merged into the Department of Management & Budget in FY 2007-08.
4. The Department of Information Technology (which was funded entirely from Interdepartmental Grants, which are not included in Adjusted Gross appropriation amounts) was merged into the Department of Technology, Management, & Budget (DTMB; previously the Department of Management and Budget) in FY 2011-12.
5. Appropriations for the Legislative Auditor General have been included in the Legislature budget in some years and included as a stand-alone budget within the General Government bill in other years. These tables show Auditor General appropriations as a separate line in all years.
6. Appropriations for the Michigan Strategic Fund (MSF) have been made in a number of ways: as a stand-alone budget bill, as part of the Department of Labor, & Economic Growth (DLEG) budget, and as part of the Treasury budget. These tables show MSF appropriations as a separate line within the General Government category in all years.
7. State Building Authority (SBA) rent payments were appropriated in the Capital Outlay budget until FY 2004-05, in the Treasury budget in FY 2005-06, and in the DTMB budget in subsequent years. These tables show SBA rent payments as a separate line within the General Government category in all years.
8. Energy functions were moved from other departments into DLEG, and the department was renamed as the Department of Energy, Labor, & Economic Growth in FY 2008-09. Funding for Workforce Development programs and the Michigan State Housing Development Authority was moved from DELEG to MSF, and DELEG was renamed as the Department of Licensing & Regulatory Affairs (LARA) in FY 2011-12. Funding for Michigan Rehabilitation Services was moved from LARA to the Department of Human Services in FY 2012-13. The Department of Insurance and Financial Services was split off from LARA in FY 2013-14.
9. The Department of Agriculture was renamed as the Department of Agriculture and Rural Development in 2011.
10. The Departments of Environmental Quality and Natural Resources were merged into a single department for FY 2010-11 but then split back into two departments in FY 2011-12.
11. Funds for facility maintenance were moved out of the Capital Outlay budget and into individual departmental budgets (Corrections, Military & Veterans Affairs, Natural Resources, etc.) in FY 2008-09. Appropriations in the Capital Outlay budget for the Michigan Natural Resources Trust Fund (the bulk of remaining appropriation amounts in that budget area) are normally made through the supplemental budget process and have not yet been made for FY 2014-15.
12. The Department of History, Arts, & Libraries was abolished in FY 2009-10, with programs and appropriations moved to other departments (Education; Information Technology; Energy, Labor, & Economic Growth; Management & Budget; Natural Resources; Strategic Fund).

Mich Personal Income (CY basis)**	26.2	20.6	7.7	4.3

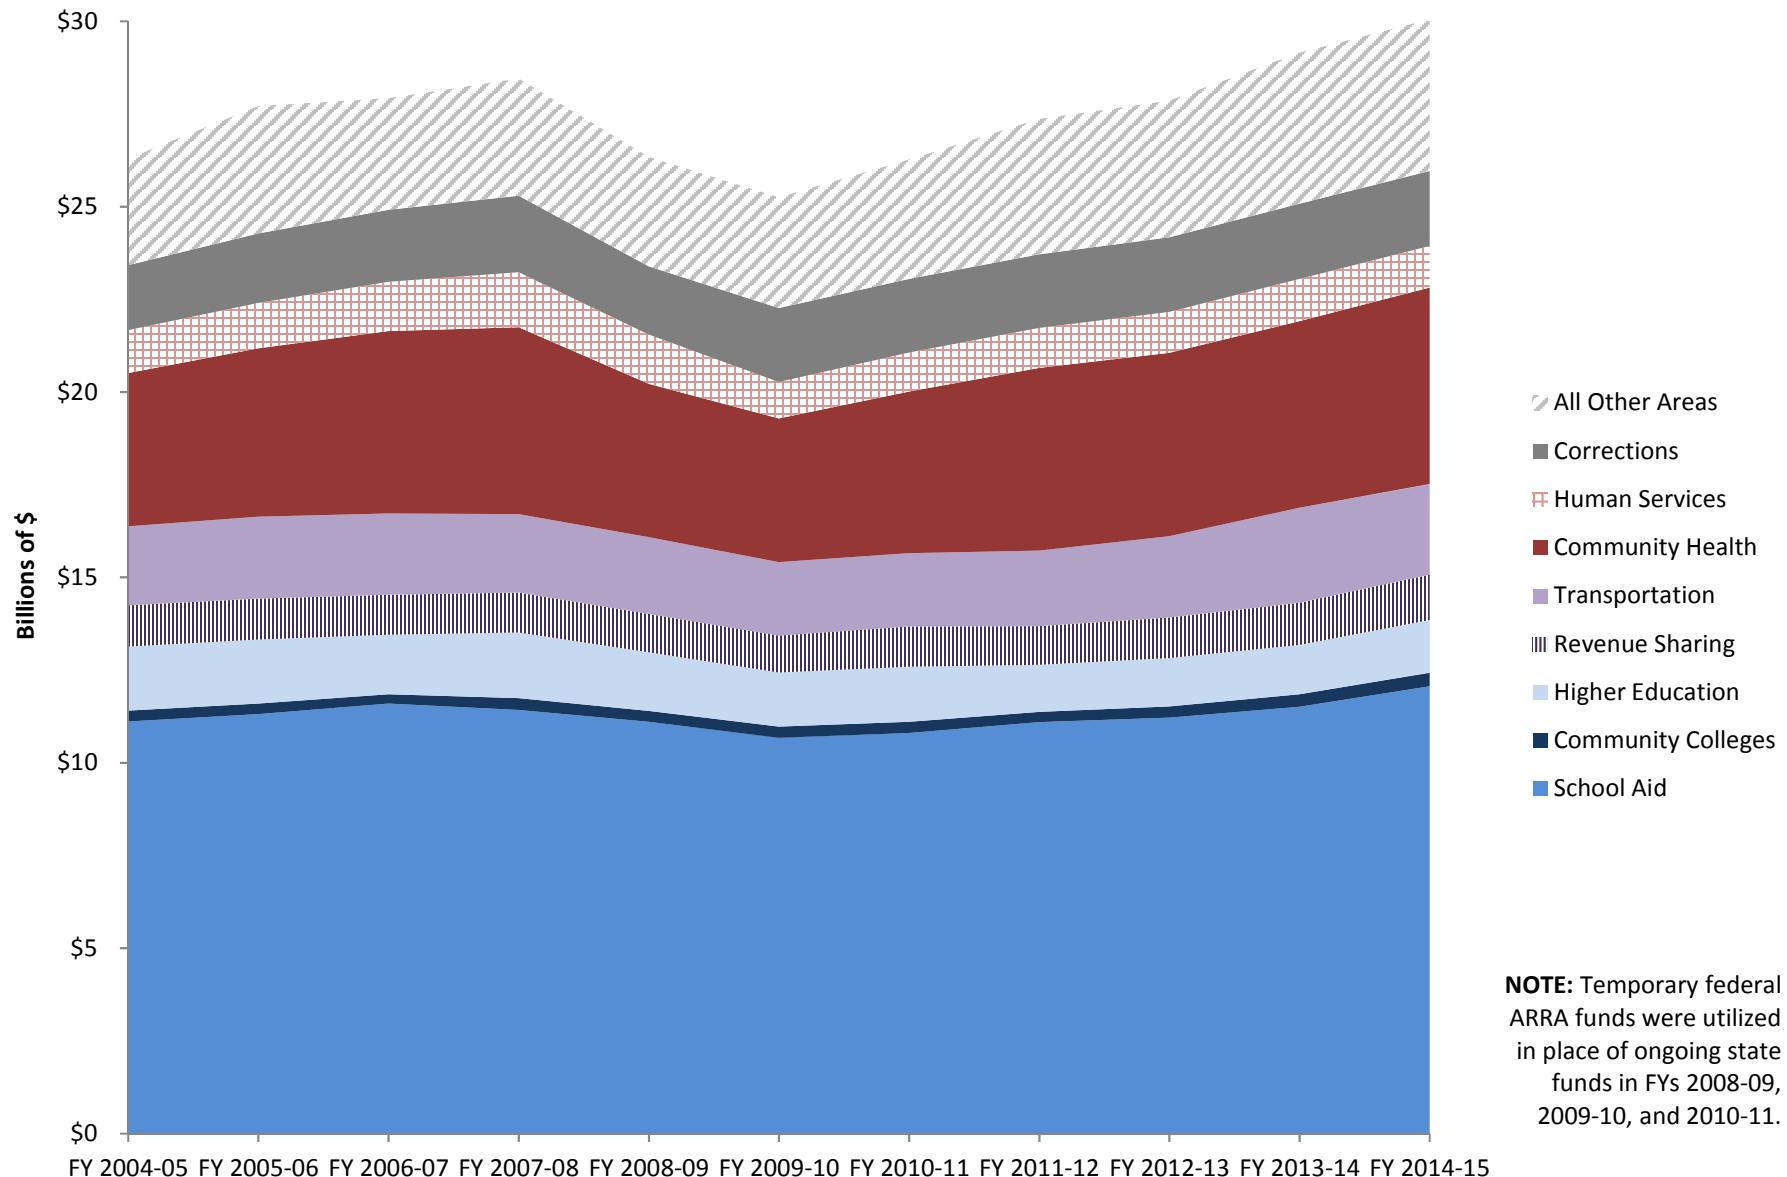

*Large percentage changes in GF/GP appropriations for some budgets are result of GF/GP funds constituting a relatively small portion of those budgets.

**Based on May 2014 consensus estimates for FYs 2013-14 and 2014-15.
