Overview

House Bill 4112 (H-1) would do the following:

- Reflect caseload-related and other adjustments in the Community Health and Human Services budgets totaling a net reduction of \$298.0 million Gross (\$90.8 million GF/GP).
- Appropriate \$14.5 million GF/GP for new expenditure needs in the Military & Veterans Affairs, State, and Treasury budgets. \$11.2 million of those appropriations are for election and information technology costs related to the May 2015 transportation funding ballot proposal. (Boilerplate language provides for additional appropriations, from restricted transportation revenue, for information technology costs if the ballot proposal is approved by voters.)
- Reduce other GF/GP appropriations by \$93.1 million. Some reductions are offset by fund shifts. Adjustments to associated federal appropriations are also included in the bill.
- Appropriate \$191.0 million in federal, private, and state restricted funds that have become available for various purposes.

In sum, the bill would reduce the FY 2014-15 state budget by \$120.2 million Gross (\$169.4 million GF/GP). The bill also contains various adjustments to budget boilerplate language, as described at the end of this document. Appropriation and boilerplate items generally correspond to requests made by the State Budget Office in supplemental request letter 2015-3.

Under Article V, Section 20 of the State Constitution and the Management and Budget Act, the Governor, with the approval of the House and Senate Appropriations Committees, is required to reduce expenditures authorized by appropriations whenever it appears that actual revenues will fall below the revenue estimates on which appropriations were based. The GF/GP reductions of \$93.1 million in the bill would, in conjunction with Executive Order (EO) 2015-5; House Bill 4110 (H-1); and certain prior-year work projects lapsed by the State Budget Director, resolve a projected General Fund/General Purpose (GF/GP) shortfall of \$456.1 million in the FY 2014-15 state budget.

An attached table provides a summary of all adjustments proposed to balance the FY 2014-15 GF/GP budget, including EO reductions, supplemental appropriation items, and work project lapses.

The project was authorized for construction in 2013 PA 102 and involves the renovation and adaptive reuse of the abandoned South Hall that was being considered for demolition. The cost adjustment would increase the total project cost to \$13.5 million, with the state share remaining at \$9.0 million and the university share increasing to \$4.5 million. LSSU attributes the cost increase to a changing construction climate driven by an increase in demand and competing jobs in the area, thereby increasing the bid amounts. The scope and cost adjustment was approved at the January 28, 2015 Joint Capital Outlay Subcommittee meeting. (1/20/15 SBO Letter)
