

March 21, 19

Dear Rep LaFace,

Thank you so much for re-submitting
the Air Bow bill. I'm 73 and I wrote
you a earlier letter in favor of

The bill in which I predicted crossbow
would soon surpass the air bow in
speed. The Tax point came out with

that Nitro XLT which shoots 450 F.P.S.
and we've all seen the Ravin ed
on T.V. shooting 3 inch groups at 100 yds.

These bows have already surpassed
the capabilities of the Air Bow.

I hurt my back cooking my
crossbow last year while hunting
in the up. and now am now

I have a number of ~~many~~
Issues & I apologize for my
poor writing but I skate too.

I believe that the vast majority
of us who would hunt under

The handicapped provision would be
very satisfied if a cap of 450 f.p.
was put on it as we know we
want the bill for the ease of safety
of shooting and not the speed.

This would cover the Benjamin bore
again thanks so much for re-submitting
bill 5150.

Respectfully,

Rich Halverson
