

Hello Committee Clerk, Molly Wingrove,

I am writing to urge the committee to **VOTE NO TO SCR7**. The justifications for hunting wolves are not based on reputable scientific data. For example, studies have shown that hunting wolves does not decrease livestock depredation, non-lethal methods of predator control (e.g. fladry and guard dogs) are more effective, and the general public support more humane methods of predator control.

Thank you for your consideration.

Alli Goriesky
