Smiles on Wheels Mission Statement: To improve the public's total health, thereby increasing the awareness of and ensuring access to quality oral health care. **Vision Statement:** To serve those in need.

Smiles on Wheels (SOW) is a non-profit mobile hygiene program comprised of Registered Dental Hygienists and coordinators, operating under Public Act 161 of 2005.

The program is focused on providing preventive oral health care services in schools, and other nontraditional settings.

In 2006, three hygienists had a vision to bring oral health care to those in underserved populations. Services include; dental cleanings, dental assessments, fluoride treatments, dental sealants, and oral health education.

Smiles on Wheels Mission Statement: To improve the public's total health, thereby increasing the awareness of and ensuring access to quality oral health care. **Vision Statement:** To serve those in need.

- Since its founding in 2006, Smiles on Wheels has surpassed the mark of serving over **30,000 children** in need in over **150 schools across Michigan, with 100 in the Lower Peninsula**.
- Smiles on Wheels partnered with the Michigan Department of Health and Human Services in 2007, under the SEAL! Michigan Program, has placed approximately 85,000 sealants on children in Michigan in efforts to prevent tooth decay.
- Smiles on Wheels also provides oral health services to several GSRP and head start preschool programs
 located throughout Southeastern Michigan. Dental care is also provided to WIC families in Jackson and
 Lenawee counties where local health departments do not have a dental clinic.

In July 2022, the SOW
Kindergarten Oral Health
Assessment (KOHA) program was
developed and implemented.

The program, in partnership with the Jackson County Health Department, has completed 47 site locations from July 2022-April 2023.

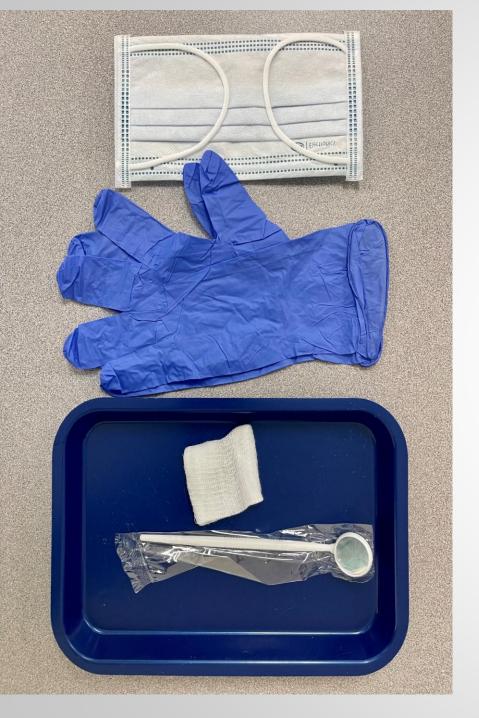

2022-23 Jackson County Summary Data

- •1651 assessments completed
- •30% dental decay/disease rate
- •29% referrals given for needed care, including 34 urgent cases involving infection, pain or rampant decay

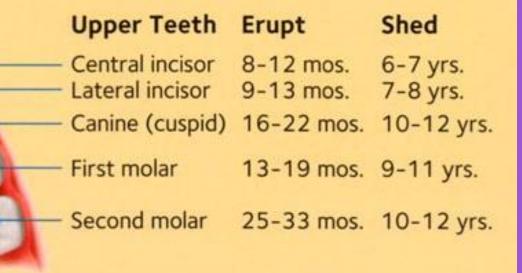

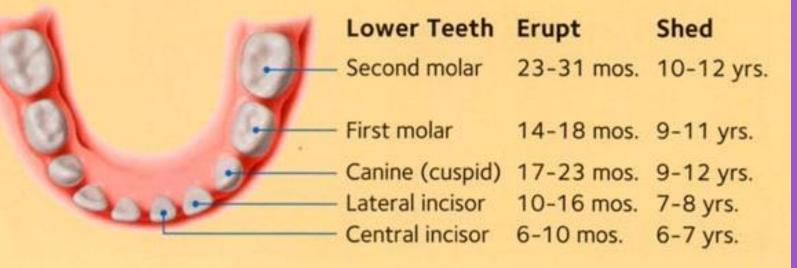

Primary Teeth

The succeeding photos will show decay in several different children ages 5-6 years old seen at our KOHA sites.

Front teeth are not lost until ages 7-8 years old. Back molars are not lost until ages 9-12 years old.
