

Hi Molly, please find below Therapeutic Health Choice's statement for HB5529

We firmly advocate for the establishment of a state-run reference facility. This facility is critical for maintaining integrity within Safety Compliance Facilities, allowing for spot audits to ensure accuracy and reliability. CRA's new reference laboratory will curtail the activities of bad actors. Michigan is not alone in this initiative; New York has already commenced construction of a similar facility, with Minnesota and other states planning or considering similar actions. This move is essential for upholding the standards and trust in the cannabis testing industry.
