

FISCAL BRIEF

THE AMERICAN RESCUE PLAN ACT OF 2021

Ben Gielczyk, Associate Director (Coordinator); [HFA Analysts](#) by Policy Area
August 31, 2021 - Updated

FAST FACTS

- On March 11, 2021, the American Rescue Plan Act (P.L. 117-2) was enacted into law as the sixth federal COVID-19 relief act
- ARPA includes appropriations to states in the following areas:
Agriculture/Nutrition, Commerce, Education, Environment, Health and Human Services, Homeland Security, Housing and Urban Development, Labor, Transportation, Treasury, Veterans Affairs, and Arts/Humanities
- ARPA also includes various short-term Tax Provisions and Direct Payments to Individuals

INTRODUCTION

The American Rescue Plan Act of 2021 (ARPA) provides significant support to state and local governments, businesses, individuals, and other entities. The following brief summarizes components of the recovery package and provides an estimated allocation for Michigan, if available. Generally, the recovery package includes direct appropriations to the state of Michigan and its local governments for COVID-19-related activities, recovery, and cost mitigation measures; benefit enhancements for individuals; and assistance to businesses and nonprofits.

Aid to the state and local governments is provided in more detail in **Table 1** at the end of this document.

AID FOR INDIVIDUALS/INDIVIDUAL TAX CREDITS

ARPA provides multiple forms of individual support through direct cash payments and temporary revisions to the tax code.

Recovery Rebate Direct Cash Payment

The direct cash payment provisions, known as a recovery rebate, will provide a direct payment of up to \$1,400 per eligible individual (\$2,800 in the case of a joint income tax return), including the dependents of any taxpayer. Dependents include full-time students younger than 24 and adult dependents.

Eligible individuals include anyone with adjusted gross income of \$80,000 or less (\$160,000 for joint filers). Rebates begin to phase out for individuals at \$75,000 (\$150,000 for joint filers). Those that file as head of household will see a phase out begin at \$112,500 and full elimination at \$120,000. Payments would be based on 2019 or 2020 tax returns, whichever tax year contains the lower adjusted gross income, and Treasury could provide payments to individuals who have not filed based on return information available to the department.

The Congressional Research Service estimates these payments will total approximately \$11.7 billion in Michigan.

Earned Income Tax Credit

ARPA makes various changes to the Earned Income Tax Credit (EITC) for 2021. The following represent ARPA changes to the EITC:

- Increases maximum EITC for adults without children from \$543 to \$1,502
- Lowers age eligibility for childless EITC from 25 to 19 and eliminates upper age limit of 65
- Eliminates prohibition on individuals with children without Social Security numbers from claiming the childless EITC
- Allows individuals separated from spouses to claim the EITC on a separate return if they live with their child for more than half the year

Background: The EITC provides support, in the form of a tax credit, to working parents with and without children. For 2020, the maximum credit for families with one child was \$3,584, and the maximum credit for families with 3 or more children was \$6,660. Childless workers typically receive a maximum credit of \$543 and the credit phases out at lower income levels.

For additional information on the EITC please see [here](#).

Child Tax Credit

ARPA makes the following changes to the child tax credit (CTC) for 2021:

- Increases maximum amount to \$3,000 per child and \$3,600 for children under the age of 6 from \$2,000
- Adds 17-year-olds to eligible children
- Makes tax credit fully refundable
- Includes phase out based on income for enhanced benefit (\$1,000 or \$1,600): full tax break available to individuals who earn up to \$75,000; heads of household who earn up to \$125,000; and married couples filing joint return earning up to \$150,000 – enhanced credit is reduced by 5% of adjusted gross income over these thresholds
- Intends to distribute half of credit in equal monthly installments beginning July 2021 through December 2021; remaining half would be claimed when filing 2021 income tax return

Background: The CTC currently provides a credit of up to \$2,000 for each child under the age of 17. The CTC is reduced by 5% of adjusted gross income over \$200,000 for an individual and \$400,000 for joint filers. Refundability is currently limited to \$1,400 of the balance if CTC exceeds taxes owed, referred to as the additional child tax credit (ACTC). The ACTC is limited to 15% of adjusted gross earnings above \$2,500. Dependents not eligible for the \$2,000 may qualify for a \$500 credit (those aged 17-18, 19-24 and in school fulltime, and older dependents).

For additional information on the CTC please see [here](#) and [here](#).

Child and Dependent Care Tax Credit

ARPA makes the following changes to the child and dependent care tax credit for 2021 only:

- Increases maximum credit to \$4,000 for one child or dependent and \$8,000 for two or more children or dependents

- Increases percentage of qualifying expenses eligible for the credit from 35% to 50% and the maximum amount of qualifying expenses from \$3,000 to \$8,000 for one child or dependent and \$6,000 to \$16,000 for two or more children or dependents
- Increases adjusted gross income level at which the credit begins to phase out from \$15,000 to \$125,000; percentage phases down from 50% to 20% for families earning \$125,000 to \$400,000 and includes a 1% reduction for each \$2,000 earned over \$400,000
- Allows credit to be fully refundable

Background: The child and dependent care tax credit provides a credit for paid expenses related to the care of a qualifying individual to enable the taxpayer to work or actively look for work. The credit is normally valued at between 20% and 35% of eligible expenses capped at \$2,100 for two or more qualifying individuals. In past years, the income level at which the credit began to be reduced was \$15,000. Also, the credit was not reduced below 20% of eligible expenses (for those earning \$43,000 or more). Lastly, the child and dependent care tax credit was not refundable.

For additional background please see [here](#).

Employer Provided Dependent Care

ARPA increases the amount of employer-provided dependent care assistance taxpayers may exclude from their taxable income to \$10,500 for 2021 only, which is an increase from \$5,000.

BUSINESS-RELATED TAX PROVISIONS

Employee Retention Tax Credit

ARPA makes the following changes to the employee retention credit established under the CARES Act:

- Extends the credit through December 31, 2021
- Expands eligibility to new startups established after February 15, 2020, and companies with revenue declines of at least 90% in a calendar quarter when compared to the same quarter of the previous year
- Caps credit at \$50,000 per calendar quarter for startups

Background: Originally enacted under the CARES Act, the employee retention credit allows eligible employers to claim a credit for paying qualified wages to employees. As created under the CARES Act, the refundable credit is equal to 50% of up to \$10,000 in wages per employee paid by an employer whose business was financially impacted by COVID-19. As established, the credit was applicable for wages paid to employees after March 12, 2020, and before January 1, 2021. Employers could get immediate access to the credit by reducing employment tax deposits they are otherwise required to make, or by requesting an advance payment from the IRS.

For more background information on the employee retention tax credit see [here](#).

Paid Sick and Family Leave Tax Credits

ARPA makes the following changes to the paid leave credits established under the Families First Coronavirus Response Act (FFCRA):

- Extends tax credits through September 30, 2021
- Increases wages covered by the paid family leave credit to \$12,000 per worker, up from \$10,000
- Increases coverage to as many as 60 days of paid family leave for self-employed individuals, up from 50 days
- Prohibits employers from receiving credits if paid leave favors highly compensated employees, full-time workers, or employees based on tenure

Background: The FFCRA, as amended by the COVID-related Tax Relief Act of 2020, provides small and midsize employers (fewer than 500 employees) with dollar-for-dollar refundable tax credits for the cost of providing paid sick and family leave wages to employees on leave for reasons related to COVID-19. Employees may receive up to 80 hours of paid sick leave for personal health needs or to care for others, and up to an additional 10 weeks of paid family leave to care for a child whose school or childcare is closed due to COVID-19. Credits vary based on reason for leave – see background link.

For more background information on the paid sick and family leave tax credits see [here](#).

The fact sheet can be found [here](#)

ARPA provides state and local government eligibility for the FFCRA paid leave tax credit. However, due to budget reconciliation the reimbursable tax credit will not be retroactive for state and local governments; effective date begins after March 31, 2021.

UNEMPLOYMENT INSURANCE PROVISIONS

Pandemic Unemployment Assistance (PUA)

ARPA extends the PUA program through September 6, 2021, and increases benefit weeks available from 50 to 79.

Background: PUA is a temporary federal unemployment insurance program funded by the federal government that provides unemployment benefits to individuals who are not eligible for state unemployment insurance. Individuals include those that are self-employed, independent contractors, individuals with limited recent work history, and other worker not covered by state unemployment insurance. Individuals must show that they cannot work due to a COVID-19-related reason – see [here](#).

Michigan's weekly benefit amount ranges from \$160 to \$362.

Federal Pandemic Unemployment Compensation (FPUC)

ARPA extends FPUC through September 6, 2021, and maintains the current \$300 per week amount.

Background: FPUC is a federal unemployment insurance supplemental benefit providing federally financed funds to individuals qualifying for any amount of unemployment benefits. The amount was originally set at \$600 per week and ended on July 31, 2020. The payment was reinstated on December 26, 2020 at \$300 per week and was set to end on March 14, 2021 prior to the enactment of ARPA.

Pandemic Emergency Unemployment Compensation (PEUC)

ARPA increases the number of weeks an individual may receive benefits under the program from 24 to 53 and extends the length of time unemployed individuals may receive PEUC benefits if they exhaust state-insured unemployment insurance benefits through September 6, 2021.

Background: PEUC provides an extension of unemployment benefits to individuals who have exhausted their state unemployment benefits. As originally enacted in the CARES Act, PEUC provides for an additional 13 weeks of federally financed unemployment benefits for individuals who exhausted state unemployment benefit eligibility. This program was extended by 11 weeks, to 24 weeks, in December 2020 with an end date of April 10, 2021. Benefit amounts would mirror state benefit amounts.

Other Unemployment Insurance Provisions

The following represent other provisions related to unemployment insurance included in ARPA

- ARPA includes a provision that will exempt the first \$10,200 of 2020 unemployment benefits from federal income tax for households with adjusted gross income below \$150,000. This provision will have a significant impact on FY 2020-21 revenues for the state of Michigan. Recent estimates have put FY 2020-21 revenue loss, when compared to January 2021 Consensus Revenue Estimating Conference, at \$600-700 million.
- States would receive full reimbursement for state costs related to waiving the one week waiting period between December 31, 2020, through September 6, 2021. This provision would retroactively reimburse states for the period between enactment and the passage of the Coronavirus Response and Relief Supplemental (CRRSA) of 2020 (December 2020).
- Short-time Programs (Work Share) would realize an extension in full federal financing through September 6, 2021. Work share programs provide employers with an alternative to layoffs by decreasing employee work hours and allowing the employees to claim a partial unemployment benefit.
- ARPA provides that the earliest date a state would begin to accrue interest on federal loans taken to pay state unemployment benefits would be September 6, 2021. To date, Michigan has not had to borrow from the federal government to pay unemployment benefits. As of April 1, 2021, the Michigan Unemployment Compensation Fund balance was \$513.2 million. Additional background information related to Michigan's unemployment trust fund can be found [here](#).
- Full federal financing of Unemployment Insurance Extended Benefits (EB), established under FFCRA, will be extended through September 6, 2021. States are normally required to finance 50% of EB costs. EB provisions begin when unemployment rates exceed 8% for the prior three months. Currently, Michigan does not qualify for EB because the state is not in a high unemployment period.
- ARPA allocates \$2.0 billion to the federal Department of Labor (DOL) to support unemployment program integrity and improved access to benefits. DOL would be authorized to directly develop systemwide program solutions for access and integrity; distribute funds to states and territories for these purposes; and provide funds to the Office of Inspector General, Department of Justice, or other agencies to support fraud investigations and prosecutions.

SMALL BUSINESS PROVISIONS

Paycheck Protection Program (PPP)

Includes approximately \$7.3 billion of supplemental funding for PPP forgivable loans. The amount included was relatively small due to approximately \$119 billion remaining from prior authorizations. Separate legislation recently extended the application period was recently extended to May 31, 2021. Approximately \$72 billion remains to be distributed.

ARPA would expand eligibility to include more nonprofits under Section 501(c) of the Internal Revenue Code other than those listed in Sections 501(c)(3), 501(c)(4), 501(c)(6), or 501(c)(19). The nonprofit must certify that not more than 15% of business is from lobbying, the cost of lobbying did not exceed \$1.0 million in the tax year that ended prior to February 15, 2020, and the organization employs 300 or fewer employees.

In addition, larger 501(c)(3) organizations and veterans' organizations that employ 500 or fewer employees and 501(c)(6) organizations, domestic marketing organizations, and covered nonprofits that employ 300 or fewer employees per physical location would be eligible.

For additional information on the PPP, including awards by state see [here](#).

Economic Injury Disaster Loan (EIDL)

ARPA provides \$15.0 billion for EIDL advance payments to businesses located in low-income communities that have 300 or fewer employees and can certify that they had an economic loss of at least 30%. Economic loss would be determined by measuring gross receipts during an 8-week period between March 2, 2020, and December 31, 2021, relative to a comparable 8-week period immediately preceding March 2, 2020. Any funds provided to a business would not be included in the gross income of the business receiving the grant.

For additional information on the EIDL see [here](#).

Restaurant Revitalization Fund

Provides \$28.6 billion for restaurants, bars, caterers, and other eligible providers of food and/or beverages. Grants would be capped at \$10.0 million per company and \$5.0 million per physical location and would be equal to the pandemic-related revenue loss of the eligible entity. Loss would be calculated by subtracting 2020 revenues from 2019 revenues. This amount would be reduced by any PPP loans received by the eligible entity. Eligible companies could not own more than 20 locations and may not be publicly traded. Of the total, \$5.0 billion will be set aside for eligible entities with gross receipts of less than \$500,000 in 2019.

Additional information can be found [here](#).

Shuttered Venue Operators

Provides \$1.25 billion of additional funding to support shuttered venue operators to serve as supplemental funding to the \$15.0 billion made [available](#) in December 2020. Awards would be reduced by an amount equal to any PPP award received by the eligible shuttered venue.

Program page can be found [here](#).

HEALTH CARE PROVISIONS

Continuation of Health Coverage (COBRA) Changes

COBRA health provisions generally let individuals purchase coverage through a former employer if they lose a job. ARPA provides temporary relief for individuals who have involuntarily lost a job or had their hours reduced by paying the entire COBRA premium from April 1, 2021, through September 30, 2021. An individual who left a job voluntarily would not be eligible for the premium benefit. Also, an individual who qualified for new, employer-based health insurance in a new position would also lose premium subsidy. COBRA subsidies will not count towards an individual's gross income.

For more background information on COBRA subsidies see [here](#).

Affordable Care Act (ACA) Premium Tax Credit (PTC) Changes

ARPA would expand the premium tax credit (PTC) to eligible individuals with an income greater than 400% of the federal poverty level for two years. Currently, the PTCs are only available to individuals with incomes between 100% and 400% of the federal poverty level with subsidies more generous at lower income levels. For 2021 and 2022 there would be no upper income limit. Rather, individuals would be eligible for a PTC if premiums exceeded 8.5% of household income.

In addition to expanding PTCs to all income levels, PTCs would reduce premium percentages at all existing income levels. PTC eligibility for individuals on unemployment would be revised as well. For 2021 only, individuals who receive, or are approved to receive, unemployment benefits would pay no-premium coverage because their income would be treated as no greater than 133% of the federal poverty level. These individuals would also receive cost-sharing reductions to lower out-of-pocket costs.

Lastly, individuals who misestimated income in 2020 would be prevented from having to repay excess premium tax credits when filing their taxes and reconciling income with PTC amount.

For more background information on ACA subsidy changes see [here](#).

Medicaid Expansion Incentives for States

ARPA includes incentives for the 12 states that have yet to expand Medicaid coverage to all adults with income below 133% of the federal poverty level under the ACA. Under current law, the federal government reimburses for 90% of the costs of coverage for those eligible under ACA Medicaid expansion. As an incentive to expand, the bill will

authorize a temporary (two years) increase of 5 percentage points in the Federal Medical Assistance Percentage (FMAP) if a non-expansion state decides to expand Medicaid coverage to all adults with income below 133% of the federal poverty level. This provision will not impact Michigan, as the state has already expanded Medicaid coverage.

Medicaid Postpartum Coverage Extension

ARPA provides incentives for states to provide postpartum coverage to new mothers in pregnancy-related Medicaid and Children's Health Insurance Program (CHIP) coverage from the current 60 day coverage period to 12 months. States would receive federal financing support for five years beginning with the first calendar year quarter one year after enactment. States would receive their regular matching rate for the additional months of coverage.

Medicaid COVID-19 Vaccines and Treatment Coverage without Cost-Sharing

ARPA requires Medicaid and CHIP coverage of COVID-19 vaccines; treatment, including prescription drugs; and treatment of conditions that complicate COVID-19 treatment, without the imposition of cost-sharing charges. This is an enhancement of FFCRA provisions, which required Medicaid and CHIP coverage of COVID-19 testing and treatment without cost sharing. States were required to provide COVID-19 testing and treatment without cost-sharing in Medicaid as part of its FMAP maintenance-of-effort requirement. The FMAP would be increased to 100% for COVID-19 vaccines and their administration.

These requirements would apply through the end of the first calendar year quarter that starts one year after the end of the COVID-19 public health emergency.

For more information on COVID-19 vaccine cost sharing see [here](#).

Testing, Vaccines, and Treatment for Uninsured

FFCRA allowed states to provide COVID-19 testing for the uninsured with the federal government providing 100% of the cost. ARPA would expand the option to cover vaccines and COVID-19 treatment without requiring cost sharing for one year after the public health emergency.

Enhanced FMAP for Home and Community-Based Services

ARPA increases the FMAP for home and community-based services by 10.0 percentage points for 4 fiscal quarters (April 1, 2021, through March 30, 2022). States would be required to use the additional federal FMAP reimbursements to supplement and enhance current home and community-based service offerings. Examples of home- and community-based services in Michigan include Adult Home Help, Mi Choice, PACE, and Community Living Supports.

Disproportionate Share Hospital (DSH) Allotment Fix

ARPA provides a technical fix to state DHS allotment calculations because of an unintended consequence of increased FMAP in FFCRA (6.2 percentage point increase). The bill would allow Health and Human Services to recalculate DSH allotments when the state received the 6.2 percentage point increase to ensure the DSH payments a state makes are equal to the total DSH payments that the state could have made for the fiscal year without the FMAP increase.

Community-Based Mobile Crisis Intervention Services

ARPA provides 85% FMAP for community-based mobile crisis intervention services for a three-year period beginning one year from enactment. The community-based mobile crisis intervention services primarily support interventions for individuals to address mental health and substance use disorder outside of a facility setting. Services are provided by a team of professionals with at least one behavioral healthcare professional and members have specialized training in trauma-informed care. Teams are encouraged to partner with health care facilities and emergency medical services within the community. ARPA also provides \$15.0 million to provide planning grants to develop offerings under state Medicaid plans.

Table 1: State and Local American Rescue Plan Act (ARPA) Pandemic Relief Funding

Funding	TOTAL	Michigan	Notes	Need for Appropriation
TREASURY				
State Fiscal Recovery Fund	\$195,300,000,000	\$6,540,417,627	<p>Use of funds:</p> <ul style="list-style-type: none"> • To respond to public health emergency (PHE) or its negative economic impacts, including assistance to households, small businesses, nonprofits, and affected industries (tourism, travel, and hospitality) • Provide premium pay for essential workers (up to additional \$13/hr in addition to base pay, capped at \$25,000) – includes pay to eligible workers of the state, or by providing grants to eligible employers that have eligible workers who perform essential work • To provide government services to the extent of the reduction in revenue of the state due to the COVID-19 PHE relative to revenues collected in the most recent full fiscal year prior to the emergency • Make necessary investments in water, sewer, or broadband infrastructure <p>Prohibited uses:</p> <ul style="list-style-type: none"> • Offset, either directly or indirectly, a reduction in the net tax revenue resulting from a change in law, regulation, or administrative interpretation that reduces any tax (includes reduction in rate, a rebate, a deduction, a credit, or otherwise) or delays the imposition of any tax or tax increase; applies to period between March 3, 2021 and the last day in the FY in which the funds are spent • Payments or deposits into pension funds <p>States can expect to receive funds within 60 days of certification with the Department of Treasury</p> <p>Allows (but does not require) Treasury to split state allocation into two tranches; first payment must be made within 60 days and second payment may be held for a period of up to 12 months from certification</p> <p>States may transfer funds to a private nonprofit organization (defined under McKinney-Vento Homeless Assistance Act 42 USC 11360(17)), a public benefit corporation involved in the transportation of passengers or cargo, or a special-purpose unit of state or local government</p> <p>Funds are available for allocation until December 31, 2024 Program page can be found here (includes rules, FAQs, fact sheets) Fact sheet can be found here State of Michigan page can be found here</p>	Yes
