CAPITAL OUTLAY

7. Glen Oaks Community College – Campus Renovation – VETOED	Gross	\$0
The Campus Renovation project at Glen Oaks Community College has a total cost of \$7.3 million; a total state share of \$3.5 million; and a total college share of \$3.8 million. The project cost is \$350,000 more than the estimated cost included in the planning authorization which would be covered by the community college. The increased cost is the result of the increased complexity of building system components and equipment in the renovated spaces. The project would involve renovation of 167,188 sq. ft. of the Library, Art Studio, and the Auto, Manufacturing, Electrical and Welding Laboratories. The facility was constructed in 1969. The laboratories would be upgraded with technological improvements that would better train students in skilled trades. A host of building improvements would be made including replacement of 50 year old windows, improved exterior wall insulation, improved ADA accessibility, and upgraded classrooms to provide modern instruction technology. The project was approved for planning authorization in 2018 PA 618.	GF/GP	\$0
8. Macomb Community College – Skilled Trades and Advanced Technology Center – VETOED	Gross	\$0
The Skilled Trades and Advanced Technology Center Renovation project at Macomb Community College has a total cost of \$44.8 million; a total state share of \$14.8 million; and a total college share of \$29.9 million. The project cost is \$4.7 million more than the estimated cost included in the planning authorization which would be covered by the community college. The increased cost is the result of the economic and construction market cost increases in Southeast Michigan. The project would involve renovation and addition of approximately 139,250 sq. ft. of the existing Skilled Trades and Advanced Technology Center. The addition would expand classrooms and technical lab spaces for various manufacturing fields. 110,000 sq. ft. of roofing would be replaced. The building would be upgraded to meet ADA accessibility standards. Windows and the ceiling system would be replaced with more energy efficient options. The HVAC system would be replaced, along with bathroom and water fountain fixtures. Various electrical system components would be upgraded. The Center would also feature upgraded Giga Speed cable, additional Wi-Fi capacity, improved flexible classroom space and security camera coverage. The project was approved for planning authorization in 2018 PA 618.	GF/GP	\$0

9. Ferris State University – Center for Virtual Learning – VETOED

The Center for Virtual Learning project at Ferris State University has a total cost of \$29.5 million; a total state share of \$22.1 million; and a total university share of \$7.4 million. The project would involve demolition of Bishop Hall and renovation and expansion of approximately 60,395 sq. ft. of Vandercook Hall. Renovation would increase the number of classrooms, laboratories, faculty offices and administrative spaces in a more centralized location and would be rebranded as the Center for Virtual Learning. Computer laboratories, online learning facilities and digital media production facilities would be expanded and provided more modern spaces. The project would include high efficiency lighting, high efficiency HVAC systems, and interior-finish materials that feature high recycled content. Bishop Hall, which has safety and structural issues such as water leakage, outdated elevators and a HVAC system that causes mold, would be torn down. The project was approved for planning authorization in 2018 PA 618.

10. Northern Michigan University – Career Tech and Engineering Technology Facility – VETOED

The Career Tech and Engineering Technology Facility project at Northern Michigan University has a total cost of \$28.6 million; a total state share of \$20.0 million; and a total university share of \$8.6 million. The project would involve the renovation of the 216,870 sq. ft. Career Tech and Engineering Technology Facility and would remove 43,000 sq. ft. of space. The renovation would include improving existing classrooms and industrial and service career laboratories to become more flexible, movable, and more interactive. Portions of the building's HVAC, electrical, and building control systems would be exposed to provide for a living laboratory. HVAC, air handling and lighting systems would be upgraded. Informal learning areas would be added along with a new educational manufacturing design center. The project was approved for planning authorization in 2018 PA 618.
