Ensuring Quality and Effectiveness

Operating Standards for Services

AASA provides operating standards for service programs to the 16 area agencies on aging and it monitors each agency on an ongoing basis to ensure they are functioning effectively and delivering quality services in the community.

Service Plans

Each area agency on aging is required to develop an area service plan and those plans are reviewed and approved by the governor-appointed Michigan Commission on Services to the Aging each year.

Client Satisfaction and Complaint Resolution

Each area agency on aging is required to have a complaint resolution and appeal procedure in place for services and they are required to have procedures in place to properly evaluate the quality of the services being provided. This may include, but is not limited to, client satisfaction surveys, client interviews, etc. In FY 2017 the network had **five (5)** service complaints and all were resolved.

Program and Service Report

Each year we publish a program and service report that details the profile of those the network served, details on the cost of services, our service levels, etc. We also have a number of special reports in this document as it relates to waiting lists, etc.
