| MANDATED AGENCY STANDARDS AND POROFESSIONAL BES  | T PRACT |   |                 |  |
| Researched and pilot tested a set of defensible agency standards and professional best practices.  |         | <ul> <li>Best practices project completed 08/30/2014.</li> <li>Presented to CLEAR on 09/25/2014.</li> </ul>   |                 | Immediate with approval                                  |
| Publish Agency Best Practices as advisory standards and implement a self assessment tool with random inspections in conjunction with other agency inspections. | 0%      | Proof of compliance for advisory best practices would be based on a self assessment instrument and telephone assistance.  | \$10,000        | Immediate with funding                                   |
| Maintain the legitimacy of these Agency Best Practices standards through on-going research, review and updating.   | 0%      | This is a new function and both of MCOLES' current Curriculum Developer positions are vacant due to lack of funding. Standards will stagnate without ongoing review and updating. | \$80,000        | Immediate with staffing                                  |
| Mandate Agency Best Practices as agency standards.   | 0%      | No current legislative authority to mandate requirements or invoke sanctions.   | Funded<br>Above | 2 months from<br>authorization and<br>rules promulgation |
| Mandate sanctions for agency non-compliance with agency standards.   | 0%      | Additional field inspectors would be needed for on-site inspections.  | \$120,000       | 2 months from authorization and rules promulgation       |
| Establish a mandatory reporting and inspection process to ensure compliance with agency standards.   | 0%      | Technical assistance and investigations would have to be increased if sanctions are established to ensure assistance and due process.   | \$150,000       | 2 months from authorization and rules promulgation       |
| Establish mechanism to gather data submitted through the self assessment process for mandated agency standards.  | 0%      | This can be automated by enhancing the MCOLES' information system to include a module for agency standards reporting.   | \$310,000       | 12 months from award of IT contract                      |
| Current Mandates   |         |   |                 | 9  |
| Authorized but underfunded, unfunded or unstaffed  |         |   | \$90,000        |  |
| Requires legislative authorization & funding   |         |   | \$580,000       |  |
| New annual costs for full implementation   |         | \$90,000  | ? — — 12? — NG  |  |
| One time development costs   |         | \$580,000   |                 |  |

NOTE: The MCOLES Information and Tracking Network (MITN) was originally designed and implemented as a licensing system. If the proposed consolidation does take place, all of the components could be enhanced to include any other public safety licensing and training function. It would be more cost effective to do the enhancement once across the board.

NOTE: Costs are reduced as the staff is split across multiple functions. These estimates assume all components being presented will actually be implemented.

| ENHANCE LAW ENFORCEMENT ETHICS THROUGH THE ADD   | TIONAL   | REVOCATION AUTHORITY IN SENATE BILL 92  |                     |  |
| Ensure law enforcement ethics through the enforcement of mandated MCOLES' investigations and revocation of officer licenses based on statute.  |          | Currently all cases subject to investigation and revocation are reviewed and prosecuted.  | Currently<br>Funded | On-going   |
| Conduct thorough background investigations into previous officers and out of state individuals with criminal or good moral character issues prior to re-admitting individuals into the profession.                               |          | These investigations are currently conducted by a single MCOLES investigator also responsible for other mandated functions.                   | Currently<br>Funded | On-going   |
| On-going site visits and inspections of agencies to verify compliance with existing selection, employment, licensing and funding standards.  |          | Field Representatives provide assistance during inspections and site visits to a randomly selected group of agencies annually.                | Currently<br>Funded | On-going   |
| Implement automated functions to assist in the background investigations to ensure new applicants, returning officers, and officers from federal, military or other states do not have criminal histories or suspended licenses. | 0%       | These components could be automated by developing interfaces within the state to databases providing this information.                        | \$20,000            | 6 months from funding  |
| Enhance law enforcement ethics by implementing the additional revocation mandates of Senate Bill 92 for assaultive misdemeanors, drug related misdemeanors, and public trust offenses.   | 0%       | Current legislation and administrative rules do not include authority to mandate field training.  | \$60,000            | 24 months for full roll-<br>out from effective<br>date of legislation. |
| Enhance background investigations into previous officers and out of state individuals with criminal or good moral character issues prior to re-admitting individuals into the profession.  | 0%       | With a rule change this can be enhanced in the future by requiring advanced screening by an agency prior to enrollment into the RPTE program. | \$60,000            | 24 months for full roll-<br>out from effective<br>date of legislation. |
