Dear Committee Clerk Ian Mays,

I am emailing you to have a voice. U.S. Supreme Court ruled vaccines Unavoidably Unsafe. Period.

- 1.) I am tired of the bullying language on waivers for vaccination.
- 2.) I am discriminated against when choosing not to vaccinate.
- 3.) If someone chooses to vaccinate, their logic is that it will protect them from whatever they believe they are protecting themselves from. What then do they have to worry about if someone is not vaccinated, since they strongly promote the idea of now being shielded. With this conviction regarding being vaccinated, perhaps they should back -off those that see Vaccines as Unavoidably Unsafe.
- 4.) I can't imagine anyone after having a child that has died from, or gone into seizures shortly after, or witnessed their healthy baby slip into dark autism, or even gotten eczema from the location of the shot that goes down one leg to the next & then telling that child (or that child's other siblings) to line-up for another "vaccine". Could You??

I see so many very healthy babies turn into very sickly, anemic looking children. It's a far cry from when I grew up and you might have heard of 1 or 2 kids in a whole school that had allergies and thought: Wow, must be a very unhealthy kid. Today there are defibrillators in the halls with anaphylactic peanut allergies posted outside the doors of many classrooms. And the list goes on.

- 5.) I have seen the list of ingredients of what is put into vaccines. It scares me to think of it being forced into anyone's body that says "No".

If you add up all of the ingredients in any or all the vaccines that are promoted, I think this is to the liking of chemical warfare personally.

- 6.) The CDC is not part of the U.S. Gov. So I do not see any authority for it to force any campaigned vaccines. Period.
- 7.) Project in 10-20yrs. from now a corrupt govt. that starts experimenting on its citizens for whatever reason & the people can not refuse those shots.....

No human should be forced, bullied into, discriminated against for choosing not to vaccinate.

With Great Respect,

Karen Csizmar
